

MICROSOFT MANAGED DETECTION & RESPONSE (MDR)

SAFEGUARD YOUR MICROSOFT ENVIRONMENTS WITH PROACTIVE SECURITY SOLUTIONS

In a digital landscape where cyber threats continually evolve, organisations deeply integrated with Microsoft Services face unique challenges in safeguarding their assets.

Our Microsoft Managed Detection & Response (MDR) service is meticulously tailored to address the security requirements of Microsoft-dependent organisations.

Harnessing the robust capabilities of Microsoft Defender for Endpoints, and with enhancement options to seamlessly integrate Microsoft Defender XDR and LogRhythm, our Managed Detection and Response (MDR) service delivers unparalleled security coverage across your Microsoft infrastructure and beyond.

HOW OUR SOC & SIEM WORKS

Integrated Microsoft Defender

By harnessing the capabilities of Microsoft Defender for Endpoints, our Microsoft MDR service strengthens endpoint devices with advanced threat protection features. Also, through seamless integration with Microsoft Defender XDR and LogRhythm, we elevate our MDR capabilities to safeguard every aspect of your Microsoft infrastructure.

24x7 SOC & SIEM

Our Security Operations Centre (SOC) and Security Incident & Event Management (SIEM) service combine to create a formidable defence strategy, ensuring rapid detection and response to cyber-attacks.

Central Threat Intelligence

We deploy and configure the SIEM technology on your premises or in the cloud, and connect it to security systems, such as firewalls, antivirus, intrusion detection, and more. We collect and store all the data generated by these systems in a centralised and secure repository, and enrich it with threat intelligence feeds from various sources.

Smart Threat Detection

We use advanced analytics, machine learning, and threat intelligence to analyse the data and identify any anomalies, patterns, or indicators of compromise. We correlate and contextualise the data to understand the nature, source, and impact of any potential or actual cyber threats.

Fast Threat Response

We alert and inform you of any security events that require your attention or intervention. We provide you with a prioritised action plan on how to respond and resolve the issue. We also provide you with support throughout and follow up with you to ensure the issue is fully resolved.

Continuous Improvement

We conduct regular reviews and audits of your security data and systems, and provide you with feedback and recommendations on how to improve your security posture. We also conduct monthly vulnerability scans and produce monthly reports to keep you updated on your security status.

MICROSOFT MANAGED DETECTION & RESPONSE (MDR)

WHY CHOOSE THE INSTILLERY'S MANAGED DETECTION & RESPONSE?

We believe New Zealand businesses deserve the best of the best, in capability and in service. We've partnered with global leaders to craft a powerful suite of networking technology wrapped around a service that instills confidence, action and capability across your business.

Comprehensive Visibility

You'll gain a clear and comprehensive view of your security posture, from the overall state of your IT environment to the detailed events and activities within your systems. We can see what's happening, what's not happening, and what needs to happen to keep your business secure.

Expert Guidance

Our experienced and certified security consultants will help you navigate the complex and dynamic cybersecurity landscape. They will provide you with advice and recommendations on how to mitigate and remediate any identified risks and threats, and how to enhance your security standards and practices.

Proactive Action

Whether you need to prevent or contain a breach, our security team will provide you with the best course of action and support you throughout the process. This will include prioritised and actionable plans for both proactive and reactive security activities as well as conducting regular vulnerability scans and producing monthly reports to keep you informed and updated on your security status.

A Personal Concierge

We are more than just a security service provider. We are your security partner who can be your assistant and trusted advisor in the ever-changing and complex security landscape. We offer you the 'Black Card' concierge service, which is the ultimate cyber security and privacy experience that gives you the edge in the digital world.
