

VIRTUAL CHIEF INFORMATION SECURITY OFFICER (VCISO)

# ACCESS THE EXPERTISE AND EXPERIENCE OF A SENIOR SECURITY PROFESSIONAL

*Hiring a full-time Chief Information Security Officer (CISO) can be challenging and costly for many organisations, especially small and medium-sized businesses.*

However, having a CISO is essential for developing and implementing a security strategy, policies, and procedures, as well as overseeing security operations, projects, and initiatives.

That's why we offer the vCISO Service, a security solution that provides you with access to the expertise and experience of a senior security professional, without hiring one internally.

## HOW OUR VCISO WORKS

### Security Strategy

We help you develop and implement a security strategy that aligns with your business objectives and protects your information assets and surrounding technologies. We use industry best practices and frameworks, such as ISO 27001, NIST, and COBIT, to define your security vision, mission, goals, and objectives.

### Security Policies & Procedures

We help you establish and maintain security policies and procedures that define the roles, responsibilities, and rules for your security program. We also help you communicate and enforce your security policies and procedures across your organisation.

### Security Operations

We help you oversee and manage your security operations, such as security monitoring, incident response, vulnerability management, and threat intelligence. We also help you select and implement security solutions and technologies that suit your needs and budget.

### Security Projects & Initiatives

We help you plan and execute security projects and initiatives, such as security awareness, security audits, security assessments, and security certifications. We also help you measure and report on the outcomes and benefits of your security projects and initiatives.

VIRTUAL CHIEF INFORMATION SECURITY OFFICER (VCISO)

# WHY CHOOSE THE INSTILLERY'S VIRTUAL CHIEF INFORMATION SECURITY OFFICER (VCISO)?

With our service, you can benefit from the guidance and support of a virtual CISO (vCISO) who will work with you to improve your security posture, reduce your cyber risks, and comply with industry standards and regulations.

## Access to Expertise

A vCISO service provides businesses with access to the expertise and experience of a senior security professional, without hiring one internally. A vCISO can help businesses develop and implement a comprehensive security strategy, as well as assist with compliance with relevant regulations and standards. Additionally, vCISO services can provide access to a team of security professionals, instead of just one individual, and can be tailored to the specific needs of the business.

## Business Alignment

A vCISO service can help businesses align their security program with their business objectives and operations. A vCISO can help businesses understand their risk appetite and tolerance, and provide them with security solutions and technologies that suit their needs and budget. A vCISO can also help businesses communicate and demonstrate the value and benefits of security to their internal and external audiences.

## Knowledge-share

A vCISO service can help businesses improve their security awareness and skills, by providing them with knowledge-share opportunities. A vCISO can help businesses educate and train their staff, stakeholders, and customers on security best practices and policies. A vCISO can also help businesses learn from the latest security trends and threats, and share insights and recommendations on how to improve their security posture.

## Compliance Management

Our vCISO service can help you comply with the relevant security standards and regulations for your industry and region, such as PCI DSS, ISO 27001, NIST, and GDPR. Our vCISO can provide comprehensive and customised inputs to the process that help you achieve and maintain compliance and avoid penalties and reputational damage. Additionally, we offer detailed reports, dashboards, and alerts that show your security status, trends, and performance.
